SOFTWARE ENGINEERING / NOVEMBER 2026

Zeyad Salama

Project portfolio

Backend depth. Frontend polish.
Secure APIs, business systems, and product experiences across SaaS, commerce, and platforms.

09
PROJECTS & SYSTEMS

Python / Django / PostgreSQL

React / Next.js / TypeScript

zeyadslama23@gmail.com

GitHub LinkedIn

Systems that turn business rules into working products.

Backend software engineer based in Egypt, specializing in Python, Django, Django REST Framework, and PostgreSQL. Work spans multi-tenant systems, financial workflows, secure identity, real-time services, and responsive interfaces.

01 **Barcode Jackets** 03
Custom apparel commerce

02 **Sukoon** 04
Real estate platform API

03 **Bee3a** 05
Business management SaaS

04 **Sahifatty** 06
Quran learning & assessment

05 **Multi-Tenant SaaS ERP** 07
ERP & financial systems

Learning & corporate training

07 **Ghaith Adex** 09
Multi-tenant delivery platform

08 **China ERP Systems** 10
Multi-tenant B2B trade

09 **Negm Feed** 11
Invoicing, payments & reporting

ABOUT THIS COLLECTION

Includes all eight projects listed in the portfolio and the Negm Feed business software described in the résumé. Metrics reflect those source materials. Project artwork is conceptual; links open the referenced websites or app listings.

CUSTOM APPAREL COMMERCE

Barcode Jackets

CONCEPTUAL PROJECT ARTWORK

Layered	Multi-store	Atomic
Customization	Catalog model	Payments & refunds

Customization & catalogs

Built an SVG-based garment customization engine with configurable layers, placement zones, text, images, fonts, colors, materials, and sizes.

Commerce workflows

Implemented multi-store catalogs, inventory reservations, quantity-based pricing, promotions, group orders, deposits, and transactional payment/refund lifecycles.

API architecture

Applied service-layer architecture, atomic transactions, UUID identifiers, optimized ORM queries, and Swagger/ReDoc documentation.

TECHNOLOGIES

Django REST / SVG engine / PostgreSQL / OpenAPI

barcodejackets.com

REAL ESTATE PLATFORM API

Sukoon

CONCEPTUAL PROJECT ARTWORK

100+	Real-time	Versioned
Automated tests	WebSockets	API contract

Discovery & booking

Developed property search, filters, ordering, pagination, media, and visit booking with owner/tenant authorization, duplicate-booking protection, and controlled status transitions.

Identity & real-time services

Implemented HTTP-only JWT sessions, refresh-token rotation, Argon2 hashing, rate limiting, role-based permissions, social authentication, Cloudinary media, and Redis-backed Channels.

Quality & performance

Optimized queries with indexes, annotations, subqueries, and eager loading. Wrote 100+ tests across permissions, listings, bookings, query efficiency, and WebSockets.

TECHNOLOGIES

Django REST / PostgreSQL / Cloudinary / Channels

sukoon.rent

BUSINESS MANAGEMENT SAAS

Bee3a

CONCEPTUAL PROJECT ARTWORK

3	AR / EN	PWA
Business systems	Bilingual & RTL	Mobile & desktop

Business operations

Combined point of sale, inventory, bookings, and online ordering in a business management SaaS for Egyptian small businesses.

Tenant & access boundaries

Provided tenant isolation, role-based access, local payment verification, and dedicated administration apps for businesses and the platform.

Language & device support

Built an Arabic-first, bilingual experience with right-to-left support and progressive web app delivery for mobile and desktop.

TECHNOLOGIES

React / TypeScript / Express / MongoDB

bee3a.site

QURAN LEARNING & ASSESSMENT

Sahifatty

CONCEPTUAL PROJECT ARTWORK

6,236	Weighted	Secure
Quran verses	Progress model	Family accounts

Learning & assessment

Developed modular APIs for Quran content, assessments, study plans, teacher-student groups, recommendations, onboarding, and contribution workflows.

Secure family access

Implemented HTTP-only JWT authentication, OTP verification, password recovery, Google/Apple/Facebook OAuth, child accounts, and granular role-based permissions.

Content & progress

Supported 6,236 verses, hierarchical subjects, configurable study templates, related-verse discovery, and weighted progress analytics, with transactional bulk operations, notifications, and Pytest coverage.

TECHNOLOGIES

Django REST / Pytest / OAuth & OTP / OneSignal

sahifati.org/#top

ERP & FINANCIAL SYSTEMS

Multi-Tenant SaaS ERP

CONCEPTUAL PROJECT ARTWORK

25+	100K+	Multi
Tenant environments	Accounting records	Currency ledgers

Tenant architecture

Architected a schema-per-tenant PostgreSQL ERP supporting approximately 25+ tenant environments with isolated business data.

Financial engine

Engineered double-entry accounting with idempotent journal posting, multi-currency cost of goods sold, and controlled calculate-lock-finalize-post payroll workflows.

Transaction safety

Designed financial services handling more than 100,000 accounting records while preserving auditability and consistency.

TECHNOLOGIES

Django / PostgreSQL / Tenant schemas / Transactions

adex-erp-react.vercel.app

LEARNING & CORPORATE TRAINING

Aljadriya

CONCEPTUAL PROJECT ARTWORK

AI	Multi-country	Corporate
Placement & study plans	Regional operations	Training agreements

Learning journeys

Combined AI placement assessments and study plans with structured learning tracks and certificates.

Corporate operations

Supported corporate training agreements, localized pricing, and financial management across multiple countries.

Connected platform

Paired Next.js with Django REST APIs, PostgreSQL, and Django Channels for learning workflows and real-time messaging.

TECHNOLOGIES

Next.js / Django REST / PostgreSQL / Channels

aljadriya-platform.vercel.app/track

MULTI-TENANT DELIVERY PLATFORM

Ghaith Adex

CONCEPTUAL PROJECT ARTWORK

60+	300+	Real-time
API handlers	Automated tests	Notifications

Delivery operations

Developed 60+ API handlers covering tenants, branches, customers, delivery agents, catalogs, orders, and notifications.

Ledger & concurrency

Implemented an auditable prepaid-coupon ledger with reserved/available balances, immutable entries, row-level locking, constraints, and idempotent reserve-settle-release workflows.

Automation & reliability

Built atomic order lifecycles, WebSocket notifications, recurring Celery delivery tours, and reminders. Created 300+ tests across identity, tenant isolation, orders, concurrency-sensitive workflows, and scheduled tasks.

TECHNOLOGIES

Django REST / Channels / Celery / Redis

Customer app

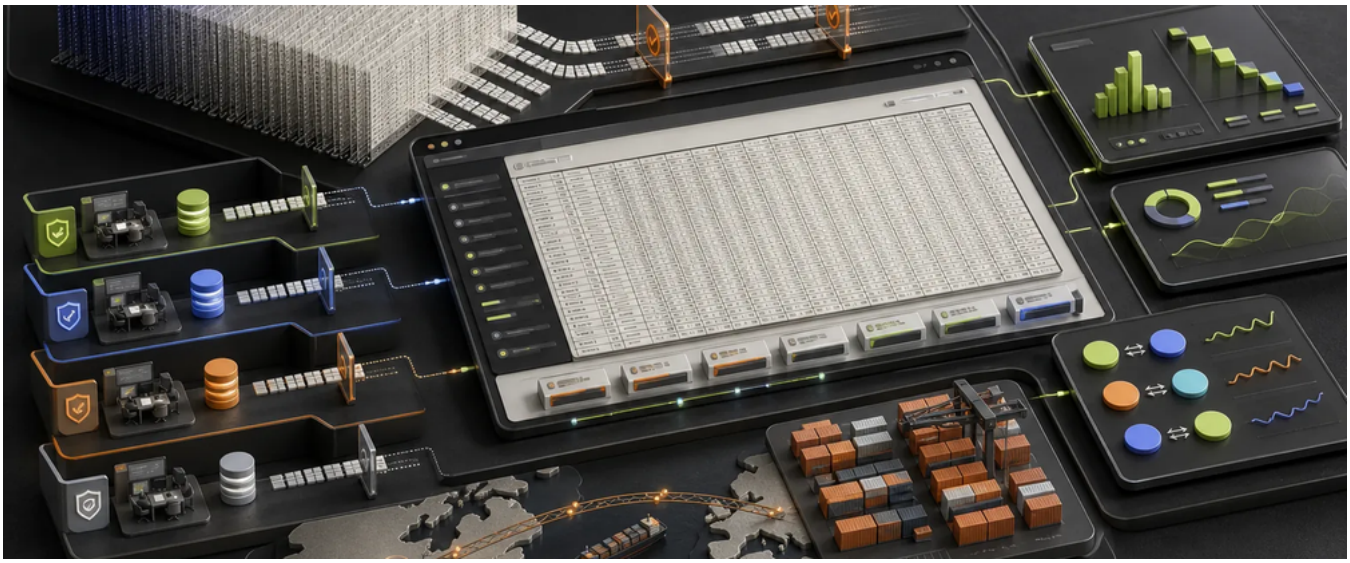

Google Play **App Store**

Driver app

Google Play **App Store**

MULTI-TENANT B2B TRADE

China ERP Systems

CONCEPTUAL PROJECT ARTWORK

50K+	2	Isolated
Rows per batch	Import formats	Import failures

Company isolation

Developed a multi-tenant B2B trade platform with isolated company data, financial workflows, and transaction-safe services.

Resilient imports

Built CSV/XLSX imports processing up to 50,000+ records per batch. Per-record transactions isolated failures while preserving successful imports.

Financial reporting

Implemented automated balance-sheet aggregation and multi-currency foreign-exchange tracking for trade reporting.

TECHNOLOGIES

Django / PostgreSQL / CSV/XLSX / Financial reporting

www.china-systems.com

BUSINESS OPERATIONS SOFTWARE

Negm Feed

Invoicing, payments, and financial reporting.

Developed Django modules and REST APIs for day-to-day business operations, covering financial and operational workflows.

INVOICING & PAYMENTS

Built invoicing and payment-processing APIs, with Stripe integration for payment workflows.

CLIENT & EMPLOYEE MANAGEMENT

Developed modules and APIs for client and employee management, alongside balance summaries.

REPORTING & DOCUMENTS

Implemented financial reporting and WeasyPrint-based PDF generation for financial and operational reports.

TECHNOLOGIES

Django / REST APIs / Stripe / WeasyPrint

LET'S BUILD SOMETHING USEFUL.
